

APPARATUS:

Engine 1

Engine one, the oldest piece in the fleet, is a 1995 Pierce Saber 1250 gpm pumper. The piece carries 1300 feet of LDH, four pre-connected attack lines and six self-contained breathing apparatus. Engine one is the primary mutual aid piece of equipment. It is housed at the Gorges Road Station

Ladder 2

Ladder two is a 2009 Pierce Arrow XT quint, with a 75 foot aerial ladder and a 1500 gpm pump. The piece is the first responding apparatus to all reported structure fires, reports of smoke and smoke detector and alarm incidents. Ladder two is housed at the Gorges Road Station

Rescue 3

Rescue three is a 2001 Pierce Saber Heavy Duty Rescue. The unit has a small 300 gpm pump and a foam proportioning unit with a 343 gallon water tank for vehicle fires and for rescue situations requiring water and/or foam. Rescue three has a full complement of rescue tools including cutters and spreaders, air bags, stabilization equipment, ropes, and a variety of hand and power tools. A Wilburt 6000 watt light is mounted on the top of the apparatus. Rescue three responds to all vehicle fires and rescue calls including motor vehicle accidents. This unit also responds to all HAZMAT calls and is fully outfitted with equipment and supplies to support this effort. Rescue three responds from the Gorges Road Station.

Engine 5

Engine five is a 2004 Pierce Enforcer pumper with a 1500 gpm pump with a Husky foam system and a Hercules compressed air foam system (CAFS). This piece is fully equipped with large diameter hose and fittings supporting water supply in the none-hydrant area of town.

Tank 6

Tank six is a 2007 KME elliptical tanker body on a Mack Granite chassis. The tank holds 3000 gallons of water and is backed by a 750 gpm pump.
